July 31st 2025

To Whom It May Concern:

**Subject: HVAC Noise Production**

The following letter has been created to satisfy the request of the Town of Perth stating the noise impacts of the ventilation equipment to be installed at 26 Craig St. following the zoning amendments applicable to the location.

I am writing to confirm that the HVAC equipment proposed for installation at 26 Craig Street will be residential-grade equipment, specifically approved and designed for use in residential applications. There is no need for commercial HVAC equipment for this project, as the intended use of the space falls well within the capabilities of standard residential systems.

As a licensed HVAC professional with over 30 years of experience, I have installed this type of equipment in countless residential homes without any history of noise or vibration complaints from neighboring properties. These systems are engineered to operate quietly and efficiently in residential settings and have consistently met all applicable codes and standards.

Thank-you,

Carl Kilpatrick
